

Red Splendor Crabapple

Malus 'Red Splendor'

Distribution: Red Splendor Crabapple can be found throughout the United States. This species of crabapple was developed in Minnesota and is hardy in colder climates to Zone 3.

Growth: The mature height for Red Splendor Crabapples is 20 to 30 feet in height.

Adaptability: This Crabapple grows best in medium moisture, well-drained soil and prefers full sun.

Comments: Red Splendor is an alternate bearer, blooming heavily every other year. Flower buds emerge rose red and open pink to rose pink. It produces small fruit typically 3/5 inch in diameter.
